Azahar program

2009

Acknowledgments

ARIJ hereby expresses its deep gratitude to the Spanish Agency for International Cooperation for Development (AECID) for their funding of this project through the Azahar Program.

ARIJ is grateful to the Palestinian officials in the ministries, municipalities, joint services councils, village committees and councils, and the Palestinian Central Bureau of Statistics (PCBS) for their assistance and cooperation with the project team members during the data collection process.

ARIJ also thanks all the staff who worked throughout the past couple of years towards the accomplishment of this work.

Background

This booklet is part of a series of booklets, which contain compiled information about each city, town, and village in Hebron Governorate. These booklets come as a result of a comprehensive study of all localities in Hebron Governorate, which aims at depicting the overall living conditions in the governorate and presenting developmental plans to assist in developing the livelihood of the population in the area. It was accomplished through the 'Village Profiles and Azahar Needs Assessment'; a project funded by the Spanish Agency for International Cooperation for Development (AECID) and the Azahar Program.

The 'Village Profiles and Azahar Needs Assessment' was designed to study, investigate, analyze and document the socio-economic conditions and the needed programs and activities to mitigate the impact of the current unsecure political, economic and social conditions in Hebron Governorate with particular focus on the Azahar program objectives and activities concerning water, environment, and agriculture.

The project's objectives are to survey, analyze and document the available natural, human, socioeconomic and environmental resources, and the existing limitations and needs assessment for the development of the rural and marginalized areas in Hebron Governorate. In addition, the project aims at preparing strategic developmental programs and activities to mitigate the impact of the current political, social, and economic instability with the focus on the agricultural sector.

All locality profiles in Arabic and English are available online at <http://proxy.arij.org/vprofile/>

Deir Razih Village Profile

Location and Physical Characteristics

Deir Razih is a village in Dura area which is located eight kilometers southwest of Hebron City in the southern part of the West Bank. The village is bordered by Yatta to the east, Hadab al Fawwar to the north, Karma and Beit 'Amra villages to the south and Khursa, Tarrama and 'Abda villages to the west.

Map1: Deir Razih location and borders

Deir Razih village extends over a mountainous area west of Hebron mountainous, with an elevation of 779 m above sea level. The mean annual rainfall is 436 mm; the average annual temperature is 16 °C, and the average annual humidity is 61% (ARIJ GIS).

The village is considered to be a rural area. It is governed by a project committee, which was established in 2004. The committee consists of three members. The services provided by the committee are:

1. Infrastructure services: providing the village with electricity and collecting solid waste and paved and maintained roads.
2. Social and human services: providing the people with food, seeds and any other social services.
3. Other services: such as the rehabilitation and construction of institutions, mosques and schools.
4. It is the link between the residents of the village and the private institutions.

History

The village officials state that the village of Deir Razih dates back to First Canaanite era. The name of the village derives from a monastery that once belonged to a Sheikh whose name was Razih and who lived in the area. There are two stories about the origin of the village residents; the first suggests that the original residents were Saudi Arabian, who were shepherders who lived in Beit Jebriel. These residents came to the village and fought the origin residents capturing it for themselves. The second story claims that the original people were from the Bani Hilal tribe.

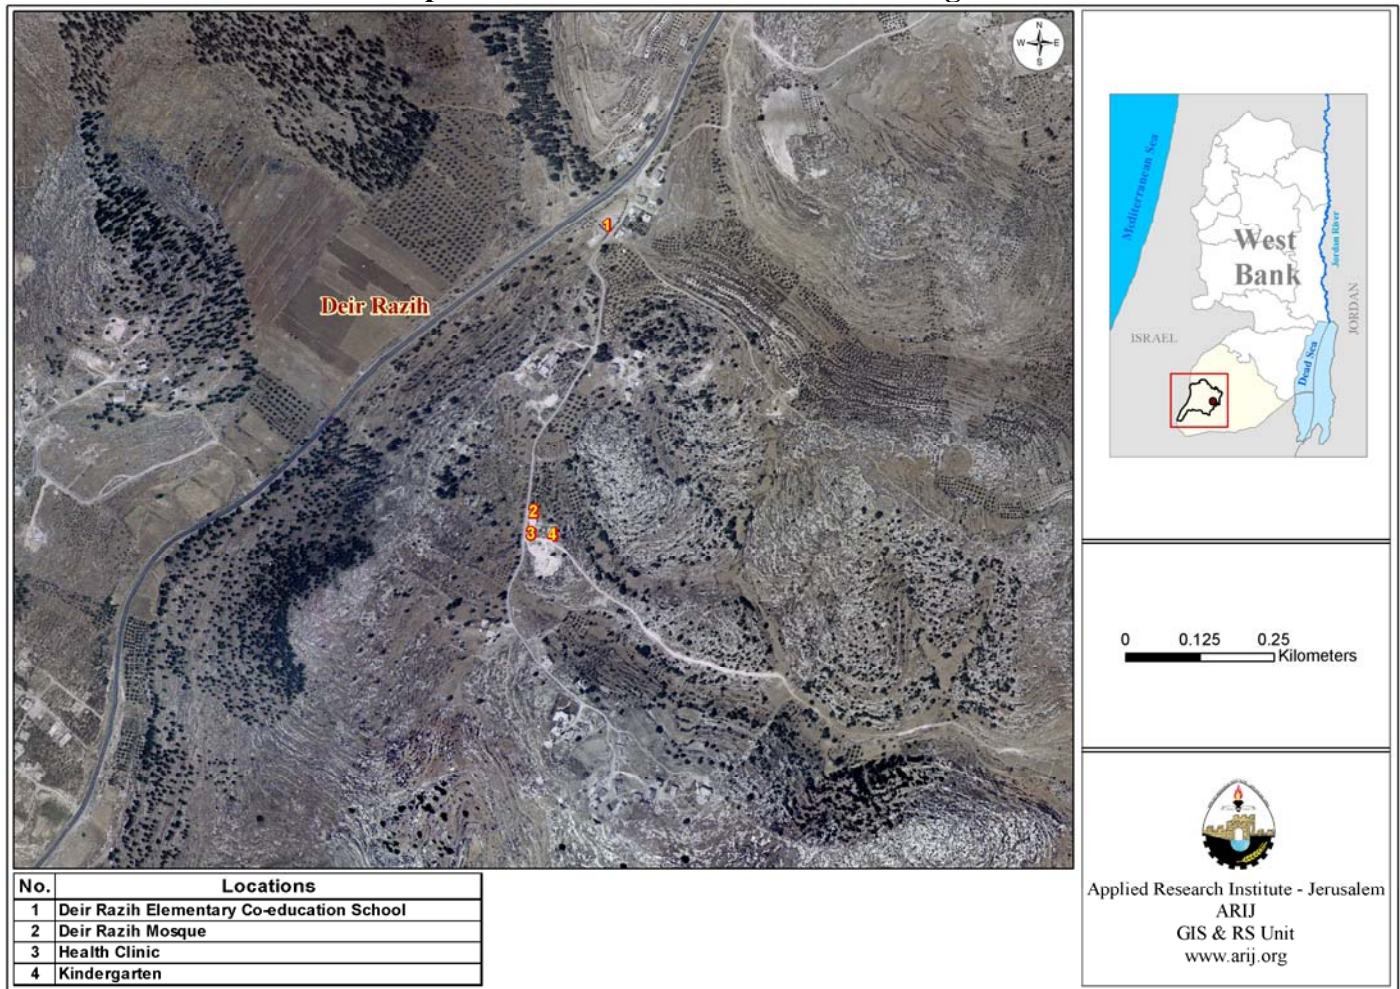

Photos of Deir Razih village

Religious and Archaeological Sites

In Deir Razih village, there is only one mosque called the “Deir Razih Mosque”. In terms of archeological sites, there are many examples of ancient Arab “Khireb”, including: Khirbet Al Jouf (Destroyed by the Israeli Forces), Khirbet Deir Razih, Khirbet Bism, Khirbet Wadi Abu Zanakh, Khirbet Khallet Al Nawamees, and Deir Al Shakh Razih.

Map 2: Main locations in Deir Razih village

Population

According to the Palestinian Central Bureau of Statistics (PCBS) Census in 2007, the total population of the village was 268 inhabitants, of whom 135 inhabitants were males and 133 were females. There are 43 households in the village living in 50 housing units.

Age Group and Gender

Population, Housing and Establishment Census – 2007, Final Results shows the distribution of population by age group and sex in the village, The results indicate that the 15-46 age groups is the main in the village’ society, where it constitutes 50.4% of the total population, while the 0-14 age groups constitutes 46.6% of the total population and the 65 years or above constitutes only 3.1% of the total population. The sex ratio in the village is 101.5 males per 100 females. In terms of percentage, the males in the village constitute 50.4% of the total population while the females constitute 49.6%.

Families

The residents of Deir Razih village come from the following families: Amro, Abu ‘Arqoub .Other small families include: Al ‘Azazma (Bedouin), Abu Qatan (From Akko) and Hdab (Adawayma).

Migration

According to the village officials, there were 35 emigrants from Deir Razih village due to the political and economic situation.

Education

According to PCBS, Population, Housing and Establishment Census-2007, approximately 4.5% of the population (aged 10 years and above) were illiterate, where the percentage of illiterate is higher among females (75%) compared to males (25%). Of the literate population, 10.2% of residents could read and write, and 23.9%, 30.1% and 17% of the population completed their elementary, preparatory and secondary education respectively. 14.2% have an associate diploma or above, see table 1.

Sex	Illiterate	Can read & write	Elementary	Preparatory	Secondary	Associate Diploma	Bachelor	Higher Diploma	Master	PhD	Total
M	2	3	22	30	13	2	11	-	-	-	83
F	6	15	20	23	17	6	6	-	-	-	93
T	8	18	42	53	30	8	17	-	-	-	176

The field survey showed that there is only one school serving the village “Deir Razih Elementary Co-education School”. This school is supervised by the ‘Ministry of Higher Education’ (MOHE), and it only provides elementary education. According to MOHE database, there are 98 students, 7 classes and 9 teachers in the school. There is one kindergarten in the village, but it is currently closed due to refurbishments.

The students in the village are forced to travel to neighboring schools to complete their preparatory and secondary education. The students have to travel about 8 km to reach Dura city.

The educational sector in the village is suffering from obstacles, which are:

- The high cost of transportation.
- Lack of schools mainly for preparatory and secondary education.
- Overcrowding in classes.
- The school buildings are old and need maintenance.
- Lack of science or computer laboratories.

The village officials of Deir Razih mentioned that the school in the village is threatened to be damaged by the Israeli Forces because it is located very close to a nearby bypass road.

Health Status

In Deir Razih village, there is a Maternity and Pediatric center, this center provides health services once a week and is supervised by the Palestinian Ministry of Health (MOH).

The village' officials state that the residents in the village are suffering from a severe lack of health centers. As mentioned previously- the residents are forced to travel about 8 km to reach Dura and Yatta hospitals and health centers.

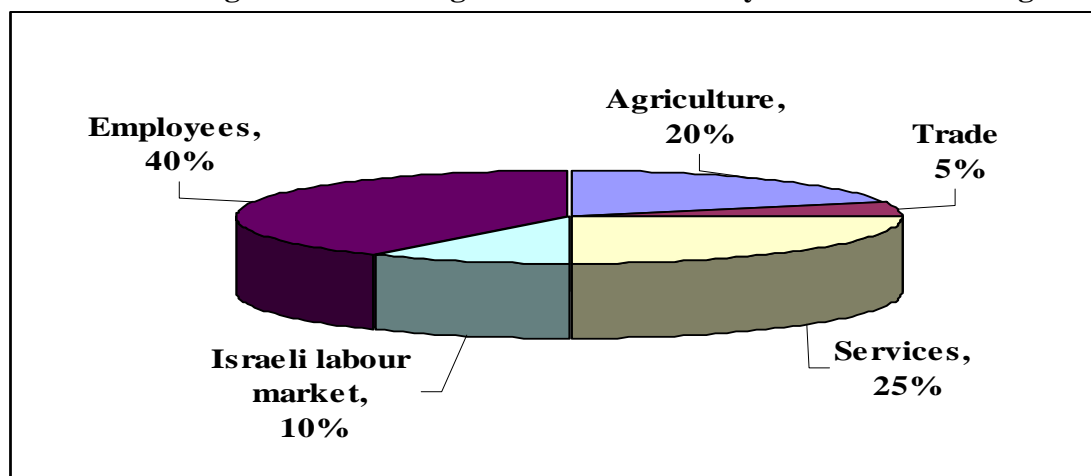

The village lacks health centers, medical equipments, doctors, ambulances, and pharmacies. This is the main problem that is currently threatening the village's health situation. Similarly, the constant Israeli activities continue to strain the health system in the village.

Economic Activities

The residents of Deir Razih village mainly depend on public and private employment and also services sector. About 40% of the residents are dependent on government and private jobs. 25% of the residents in the working age range (above 10 years of age) are dependent on the service sector. 20% of the residents are depending on agriculture sector, and there are about 10% working inside Israel and 5% depending on trade and commercial activities (see figure 2). There is one small shop serving the residents of the village otherwise they access Dura and other villages.

According to village officials' estimates, the economic base of the village consists of the following sectors:

- Agricultural Sector (20%)
- Trade and the Commercial Sector (5%)
- Services sector (25%)
- Government or Other Employees (40%)
- The Israeli Labor Market (10%)

Figure 1: Percentage of economic activity in Deir Razih village.

Based on a survey conducted in 2007 by ARIJ in the Hebron Governorate localities, the social groups most affected in the village by the Israeli restrictions during the second Intifada were: 1) previous workers in Israeli labor market, 2) Small-holder farmers, 3) Families maintaining 6 individuals and more, 4) Housekeeping and children, 5) Small-holder traders.

Labor Force

According to PCBS Census in 2007, the final results indicated that approximately 31.3% of the population in Deir Razih was economically active, while 68.7% were non-economically active. Out of the economically active people in the village, 76.4% were employed persons of whom 90.5% were males. Out of the non-economically active people, 55.4% were students, 36.4% were housekeeping and 8.3% were unable to work, not working (not currently looking for work) (see table 2).

Sex	Economically Active				Not Economically Active						Total
	Employed	Currently Unemployed	Unemployed (Never worked)	Total	Students	House keeping	Unable to work	Not working & Not looking for Work	Others	Total

Map 3: Land use/ land cover and the Segregation Wall in Deir Razih village

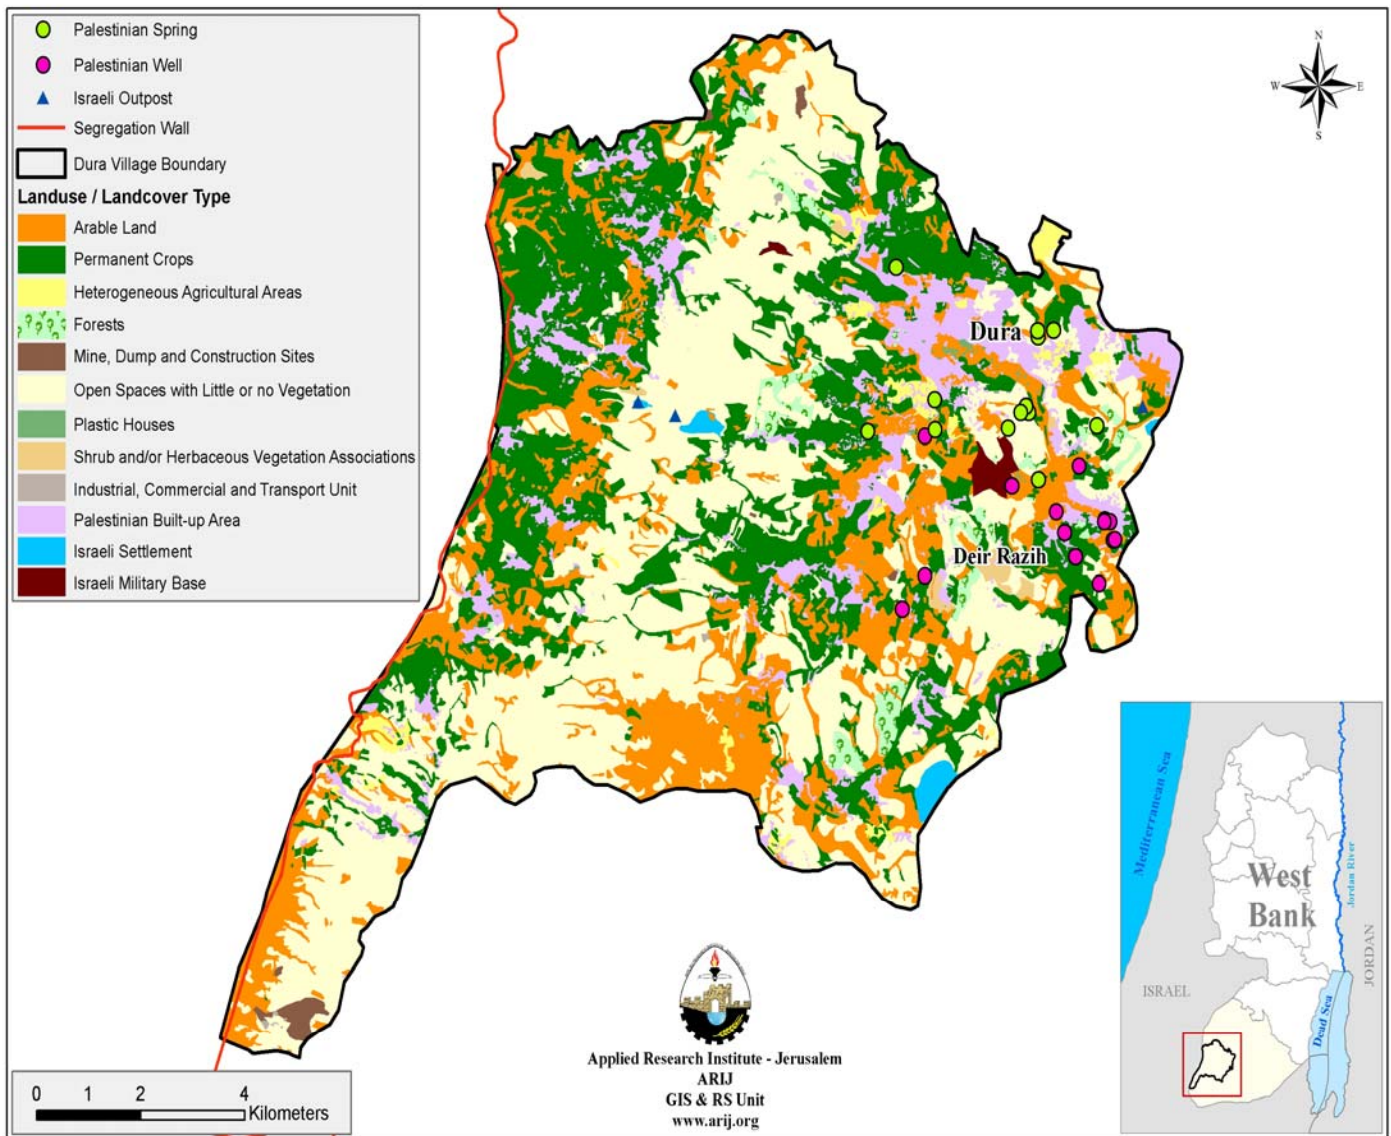

Table 4 shows the different types of rain-fed and irrigated open cultivated vegetables in the village of Deir Razih. The rain-fed fruity vegetables are the most cultivated accounting for an area of about 75 dunums. The most common vegetables cultivated within this area are tomato, squash and snake-cucumber.

Table 4: Total area of rain fed and irrigated open cultivated vegetables in Deir Razih Village (dunum)

Fruity Vegetables		Green Legumes		Other Vegetables		Total area	
Rf	Irr.	Rf	Irr.	Rf	Irr.	Rf	Irr.
75	0	1	0	5	0	81	0

Rf: Rain-fed, Irr: Irrigated

There are 3 types of aromatic medical plants in the village of Deir Razih which spread over a total area of about 3 dunums (two dunums rain fed and one dunum irrigated). These plants are thyme, mint and sage.

The olive trees are the main crop cultivated in Deir Razih village with a total area equal 292 dunums. Nuts are also planted in the village with a total area of 69 dunums, (most of this area is planted with almond trees). There are other fruit trees planted in the area that total 109 dunums. These trees are mostly grape vines and fig.

Table 5: Total area of horticulture and olive tree in Deir Razih Village (dunum)

Olives		Citrus		Stone Fruits		Pome Fruits		Nuts		Other Fruit		Total area	
Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr
292	0	0	2	21	0	8	0	69	0	109	0	409	2

Rf: Rain-fed, Irr: Irrigated

Table 6 shows the total field crops cultivated in the village of Deir Razih. Cereals, in particular wheat and barley, are the most commonly cultivated crops in the area, accounting for about 323 dunums. In addition, the cultivation of forage crops such as bitter vetch and common vetch is also common in the village of Deir Razih. There are about 16 dunums of dry legumes cultivated in the area, mainly lentil and chick-peas.

Table 6: Total area of field crops in Deir Razih Village (dunum)

Cereals		Bulbs		Dry Legumes		Forage Crops		Stimulating Crops		Total area	
Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr	Rf	Irr
323	0	2	0	16	0	103	0	1	0	445	0

Rf: Rain-fed, Irr: Irrigated

The data also indicates that the residents of the village are also dependent upon rearing livestock (accounting for 20% of the total village population. The number of cows in the village is 16; there are 800 sheep and 280 goats.

Table 7: Livestock in Deir Razih Village

Cows*	Sheep	Goats	Donkeys	Broilers	Bee Hives
16	800	280	12	39,500	59

*Including cows, bull calves, heifer calves and bulls

The main sources of water for irrigation in the village are rain fed and springs. The total length of the agricultural roads in the village of Deir Razih reaches 20 km, which is currently unpaved and only suitable for tractors, other agricultural machines and animals.

The agriculture sector in the village suffers from a lack of agricultural services and lack of veterinary services. The Israeli Forces have cut and destroyed about 20 olive trees in Deir Razih village.

Institutions and Services

Deir Razih village is a small village. Its residents get most of their services from Dura city and other neighboring villages. The main institution in the village is the project committee, founded in 2004 which manages most of the residents' services.

Infrastructure Services

Telecommunication Services: Deir Razih village is connected to a telecommunication network, and about 70% of the housing units in Deir Razih village are currently connected.

Water Services: Deir Razih village is not connected to any water network. The alternative resources of water used in the village are the cistern and water tankers. In Deir Razih, there are two springs: Ein Al Debla, which is inaccessible to residents because of current Israeli procedures. The second spring is "Ein Abu Zanakh which is in severe need of rehabilitation.

Additional, there is a reservoir with a capacity of 300 m³. However, the village officials cite several obstacles that face the water conditions these include: lack of any water network, shortage of water, lack of wells, and constant Israeli activities.

Electricity Services: Deir Razih village has been connected to an electricity network since 1990, the electricity is provided by the Al Qutria Company (an Israeli Company). According to village officials, 100% of the housing units are connected to the network.

Sewage Disposal Facilities: Deir Razih village is not connected to any sewage disposal network, and the waste water is disposed of in cesspits and open channels.

Solid Waste Collection Services: There is no solid waste services system in the village, and each household must dispose its own garbage by burning it in open area.

Transportation Facilities: Deir Razih village lacks any kind of official transportation services. The residents mostly use their private cars or access near villages to travel outside the area. The primary obstacles to transportation in the village are the presence of military road blocks and earth mounds, and the lack of vehicles and automotive services.

In terms of road qualities, 700 meters of main roads are paved and in good condition, 900 meters of internal roads are paved but in bad condition and 5,000 meters of internal roads are unpaved. There are about 20,000 meters of agricultural roads, which are only suitable for agricultural purposes.

Impact of the Israeli Occupation

To the south of Deir Razih, there is an Israeli settlements called “Otan’el”, the total area of the settlement is about 2,000 dunums; from the west there is also a bypass road called “Road 60”. The village is also subjected to a one permanent checkpoint, flying checkpoints and one earth mound.

The Israeli Forces have destroyed two houses in Deir Razih village since the beginning of the Second Intifada. They have also declared about 350 dunums to be confiscated, though this has yet to be implemented.

Development Plans and Projects

Village officials cite that since the Second Intifada, the village has only implemented one project for the residents. This project was called “Work against Food program”, which was funded by the Catholic Relief.

Locality Development Priorities and Needs

According to Deir Razih project committee, the village has suffering from a shortage of many infrastructure and services needs. Table 8 below shows the development priorities in the village.

No.	Sector	Strongly Needed	Needed	Moderately Needed	Not Needed	Notes
Infrastructural Needs						
1	Opening and Pavement of Roads	*				15 km
2	Construction of New Water Networks	*				10 km
3	Rehabilitation of Old Water Networks				*	
4	Construction of Water Reservoirs				*	
5	Extending the Water Network to cover New Built up Areas				*	
6	Construction of Sewage Disposal Network		*			
Health Needs						
1	Building of New Clinics or Health Care Centre			*		
2	Rehabilitation of Old Clinics or Health Care Centres	*				
3	Purchasing of Medical Equipments and Tools	*				
Educational Needs						
1	Building of New Schools	*				Secondary
2	Rehabilitation of Old Schools	*				Preparatory
3	Purchasing of New Equipments for Schools	*				
Agriculture Needs						
1	Rehabilitation of Agricultural lands	*				
2	Building Cisterns	*				30
3	Construction of Barracks for Livestock	*				10
4	Veterinary Services	*				
5	Seeds and Hay for Animals	*				
6	Rehabilitation of Greenhouses				*	
7	Field Crops Seeds	*				
8	Plants and Agricultural Supplies			*
